EXPERIENCE

Frontend Developer with 2 years of Experience

Geekyants

📅 Aug 2022 – present

- **React Native Expertise:** Developed reusable and well-documented UI components for a popular open-source UI library (20k+ stars on GitHub), demonstrating strong IOS and Android Application development skills.
- **Next.js Front-End Development:** Built the user-facing front-end of a Next.js platform for real estate management (UK market), showcasing expertise in building responsive web applications.
- **Project Leadership (Front-End):** Led the front-end development team from scratch, utilizing Next.js to build a complex maid booking platform (UK). This demonstrates leadership in managing a Next.js project, building a user-centric interface, and taking ownership from initial concept to completion.
- **Innovation and Problem-Solving (Front-End):** Developed a Chrome extension that finds NFT details using its ID, demonstrating creativity and frontend development for browser functionalities.

PROJECTS

Nativebase (Company Product)

React,React Native,Expo,Tailwind CSS

- NativeBase is an accessible, utility-first component library that helps you build consistent UI across Android, iOS and Web.
- Contributed to the companys open-source product by developing reusable components from scratch for mobile and web
- Nativebase has over 20k stars in Github and 50k + dependents
- Developed user friendly and responsive UI componets and contributed to the companys core product
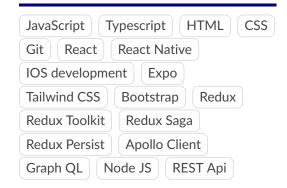

Landlord-Tenant Hub

Next js,Tailwind CSS,Redux Toolkit,Redux Saga,Redux Persist,REST Api

- Built a responsive and user-friendly Next.js super admin panel for empowered centralized tenant and landlord management within a single web application.
- Developed high-performance Next.js app with app routing and client-side rendering for blazing-fast UIs, styled with Tailwind CSS, managing state with Redux Toolkit,Saga and Persist, and utilizing RESTful APIs for efficient backend communication

Maid Booking Platform

Next Js, Tailwind CSS,Redux Toolkit,GraphQl,Apollo Client

- Lead and delivered a web application project from concept to launch, utilizing Next.js for a performant and scalable frontend
- It included real time functionalities including the chat.
- Implemented authentication and role-based / permission-based access control.
- Leveraged Tailwind CSS for rapid development of a beautiful and responsive user interface, ensuring a positive user experience.
- Implemented Redux Toolkit for efficient state management within the Next.js application, facilitating seamless data handling.
- Established seamless backend integration using GraphQL and Hasura, enabling efficient data fetching and manipulation
- Leveraged my frontend expertise to collaborate with the backend team in creating database design, identifying and resolving performance bottlenecks. Additionally, assisted with debugging backend issues to ensure optimal application functionality. .

SKILLS

JavaScript · Typescript · HTML · CSS · Git · React · React Native · IOS development · Expo · Tailwind CSS · Bootstrap · Redux · Redux Toolkit · Redux Saga · Redux Persist · Apollo Client · Graph QL · Node JS · REST Api

ACHIEVEMENTS

- Gave a tech talk session on Zustand to the company on why they should switch to Zustand instead of traditional redux and it would help the developers.
- Developed a Chrome Extension for the growing NFT market
